I think they can only get it if they complete the online course. Everyone had the opportunity to attend with vigilant instructors but some elected not to attend, now they can complete the course and get access that way.

Subject: RE: Facial recognition access

Now for the next question – do you want all the detectives who have accounts to have access to Facial Recognition also, whether or not they have been through any training? I'm leaving that decision up to the two of you. I'll set up AI based on what you decide.
